SIIMUPASS – UNIFIED MOBILITY PAYMENT PLATFORM

SiimuPass

INTRODUCTION

SiimuPass is a digital mobility payment platform developed by RopaTech Solutions to simplify how people access and pay for transportation services in Uganda.

The platform enables users to pay for multiple mobility services through a single mobile application by linking their **mobile money accounts or bank accounts**.

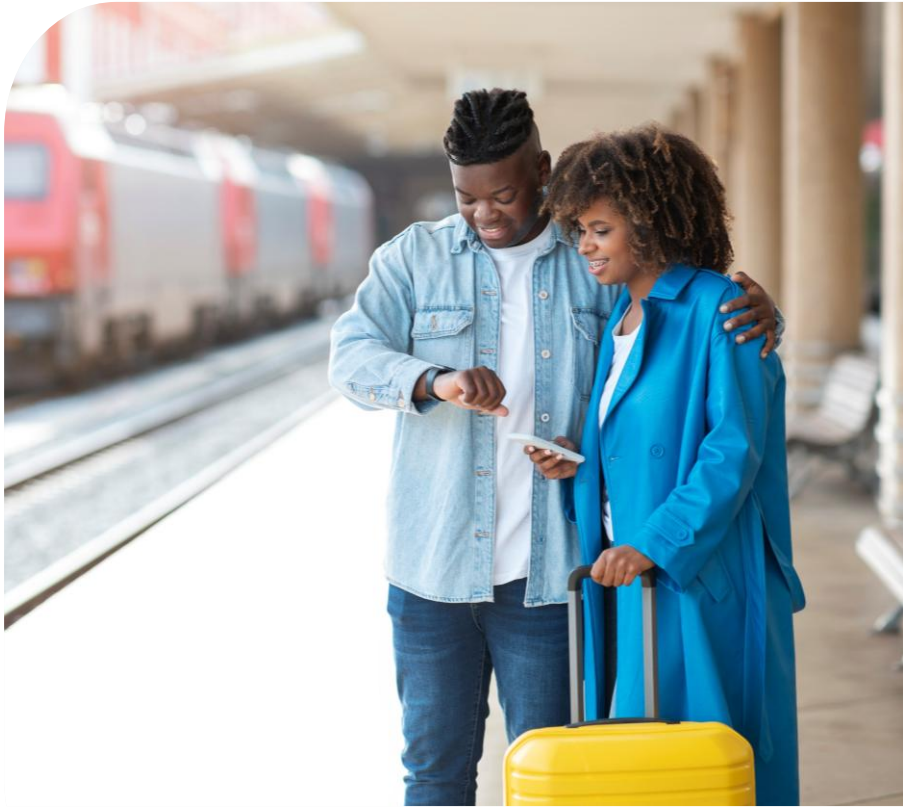
SiimuPass is designed to support the evolution of **smart transport infrastructure** in Uganda.

The Problem SiimuPass Solves

Transportation and urban mobility services in many cities face several challenges:

- ✓ Fragmented payment systems across transport services.
- ✓ Heavy reliance on cash payments.
- ✓ Long queues and delays in payment processing.
- ✓ Revenue leakages due to manual systems.
- ✓ Limited digital integration between transport providers.

These challenges affect **passenger convenience, operational efficiency, and revenue management**.



INTRODUCING SIIMUPASS

SiimuPass is a **single digital platform** that enables users to pay for multiple transport and mobility services through one account.
Users can link their:

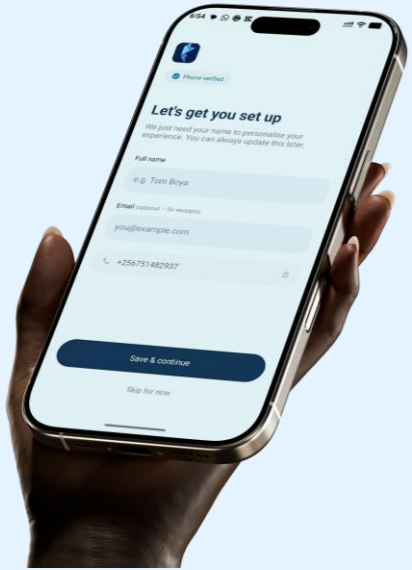
- Mobile Money accounts
- Bank accounts
- and make payments instantly through the SiimuPass mobile application.

CORE VISION

A unified digital payment ecosystem for transportation and urban mobility services.

KEY FUNCTIONALITIES OF SIIMUPASS

SiimuPass provides a wide range of mobility payment services:



- Expressway toll payments.
- Railway ticket purchases.
- Smart parking payments.
- Future public transport payments (bus & taxi systems).

The platform acts as a **single mobility wallet for users.**

EXPRESSWAY TOLL PAYMENTS

SiimuPass allows drivers to pay toll charges digitally without needing cash at toll booths.
Features include:

- Prepaid toll wallet
- Automatic toll deductions
- Mobile money and bank payment options
- Transaction history and toll usage tracking

This helps reduce congestion and improve efficiency at toll plazas

RAILWAY TICKETING

SiimuPass enables passengers to purchase railway tickets digitally.
Passengers can:

- Select routes and travel schedules.
- Purchase tickets through the app.
- Receive digital QR tickets.
- Present the ticket for verification during boarding.

Benefits include reduced queues and improved passenger convenience.

SMART PARKING

SiimuPass supports digital payments for urban street parking.
Drivers can:

- Locate parking zones.
- Pay parking fees digitally.
- Extend parking sessions remotely.
- Receive instant payment confirmation.

Parking officers can verify payments through **real-time digital validation**.

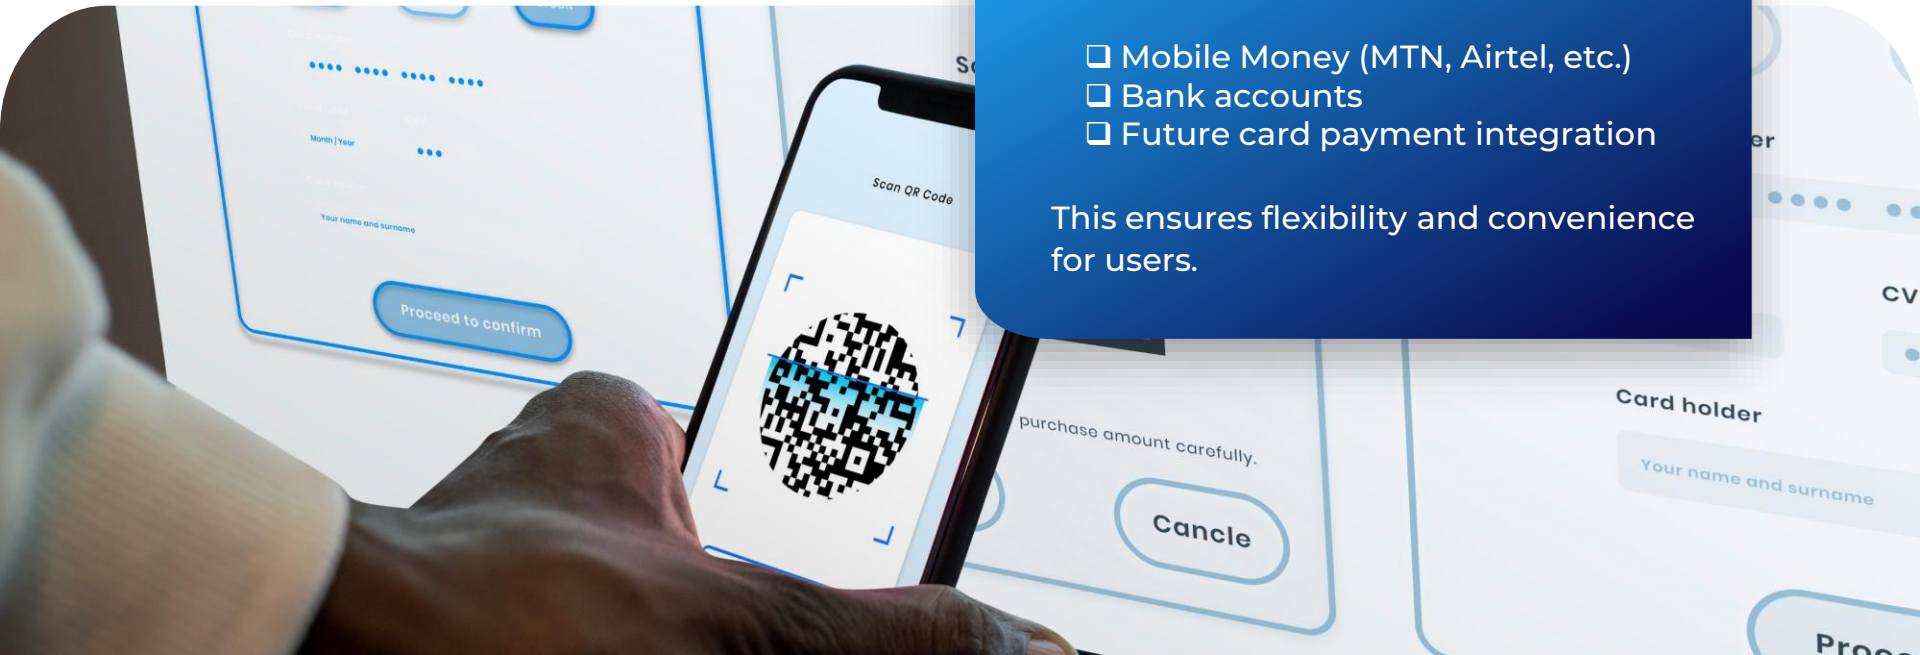
INTEGRATED PAYMENT INFRASTRUCTURE

SiimuPass connects multiple financial systems to ensure seamless payments.

Supported payment channels include:

- ❑ Mobile Money (MTN, Airtel, etc.)
- ❑ Bank accounts
- ❑ Future card payment integration

This ensures flexibility and convenience for users.



BENEFITS OF SIIMUPASS

SiimuPass delivers benefits for both **users and service providers**.

For Users

- Convenient digital payments.
- One account for multiple mobility services.
- Faster, convenient and efficient travel experience.

For Service Providers

- Increased payment efficiency.
- Improved revenue transparency.
- Reduced cash handling risks.
- Access to real-time operational data.

SiimuPass aims to become **Uganda's unified mobility payment platform**, connecting multiple transportation systems into one digital ecosystem.
Through partnerships with transport operators, infrastructure providers, and urban service managers, SiimuPass seeks to support the development of a **modern, efficient, and digitally connected transport network for Uganda**.
